Furniture for meetings
EFG HideTech AVM & EFG HideTech

EFG HideTech AVM features a slim screen with a streamlined design. The work surface itself is in linoleum, which is non-reflecting and has a sound-absorbing effect.

Meetings like never before. Real and virtual.

The screen is protected by tempered glass screen. With the screen lowered, EFG HideTech AVM acts as a regular meeting table.

Meetings have become an increasing and ever more important aspect of everyday working life. Spontaneous or scheduled, short or long, in-house or with clients. Surveys show that people already spend just as much time in collective areas as at their own desks.

Virtual meetings are also becoming a regular feature, influenced by economic and environmental factors, people working from home, and technology that makes it possible. The EFG HideTech range of meeting tables has been developed with all of that in mind.

We have developed ten new table shapes with gentle corners and bevelled edges, specially for EFG HideTech. Several of them are 1100 mm wide to reflect the trend towards smaller meeting rooms.

There's a connection box located in the middle of the work surface. Computer leads, for example, are concealed with a cover. And cables to external sockets are led down desk legs to floor level.

EFG HideTech – AVM table

Monitor, camera, loudspeakers, microphone, a built-in box for data/power and smart cable management – and you can integrate your own computer. EFG HideTech AVM is the meeting table that has it all, giving you a flexibility that's out of the ordinary.

It can be part of a traditional meeting room. Or part of the office landscape, easily accessible by all co-workers. EFG HideTech AVM isn't just functional, it builds the brand, and it's got attitude. It's ideal for companies with meeting rooms as part of their offering, such as conference centres, office complexes, airports and other enterprises with lounges.

EFG HideTech – the family

EFG HideTech is a complete family. It features integrated technology, new shapes, materials, heights and sizes – all designed to work for new ways of meeting.

Table top shapes that let you see and be seen. Stand-up tables for short informal meetings, as well as tables for more traditional meetings.

EFG Mariquita. Versatile value for money.

EFG Mariquita (Spanish for ladybird) is available in a number of versions. Leg frame, five star base or skid base in chrome, white or black. Design: Ximo Roca Asensio.

EFG Mariquita is a great value chair with a myriad of uses. In breakout areas and training rooms, in cafés and as visitor seating. Available in eight colours and as a barstool in three heights.

EFG Mariquita with legs or skid base can be stacked up to 12 chairs high. As an option, there is a trolley with lockable castors.

Mongezi

Mongezi is now available in two new table shapes. Like new Cirkeln, they come in HPL, brown or black linoleum, birch, or natural walnut. White, black, dark grey metallic or chrome frame.

Cirkeln
